MADE IN BRITAIN, SPINNING ALL OVER THE WORLD

Technical details

Heavy Duty Steel Fabrication

Manufactured in our state-of-the-art UK manufacturing facilities. Designed with surplus strength in mind to exceed expected working loads. Fabricated by Skilled steel fabrication engineers and finished to withstand the harsh UK environments for many years.

Inverted Running Gear

All running gear wheels are stationary on the ground and the turntable runs over them. Designed to give ease of access to all key equipment through inspection chambers set in the turntable top.

Engineered Nylon Running Gear

Our Nylon 66 running gear is manufactured in-house to our own design. Our running gear is designed to produce very low running noise. Each nylon wheel is finished off with two heavy duty sealed for life bearings giving a load capacity of 750Kg per wheel.

Bespoke Drive Wheel

Spin-It have developed a unique drive wheel that has been specifically designed to give high grip in the wet and also maintain a very low wear characteristic. This unique solution means that our Turntables will give years of reliable service.

Durable Electrical Motor Drive

All of our motorised Car Turntables are driven by heavy duty, Industry Grade electric motors and gearbox's. We use 0.375Kw drive motors as a standard on all systems. The turntable drive system runs off a standard domestic 240V single Phase supply and is controlled by means of an industrial grade inverter. The inverter gives control of direction and speed as well as allowing for Soft Start/Soft Stop and safety monitoring functionality.

Key-Fob Remote Control

To make operating the turntable as comfortable as possible, Spin-It can offer an integrated FM Remote control system that allows the turntable to be operated from the comfort of your car. The remote-control system comes with added KeyLock security features that ensure your turntable will not accidentally pick up other remote controls and start to operate without warning.

A Corporate Member of the Guild of Master Craftsmen

Spin-IT are proud of the quality and craftsmanship of our products and the professionalism of service we offer to all our clients. To reflect this Spin-IT has been accepted as a corporate member of the guild of master craftsmen. This endorsement reflects the high standards that we have set ourselves.

One Stop Shop Facility

To make matters simpler for customers, Spin-It can offer a complete start to finish installation service.

From groundwork's right through to landscaping, Spin-It can simplify your project management by carrying out all key turntable installation tasks as a single project.

MADE IN BRITAIN, SPINNING ALL OVER THE WORLD

Guidance notes

The following notes may assist you with your purchasing decision.

Lead Times:

All our Turntables are made to order, we therefore require a minimum of 6 weeks lead in time from order confirmation to Installation.

Scheduled Installation date:

We strongly advise all our clients to ratify your installation date with your contractor to ensure all groundwork and preparation will be complete on this date. Charges are necessary as we have to schedule our works and installers

Change notification	Charge
Over 4 weeks	No charge
4 weeks	£50.00
3 weeks	£100.00
2 weeks	£150.00
1 week	£200.00
3 days or wasted Journey	£500.00
